GRAPHENE LAYER COATING
ENGINE OIL ADDITIVE

MADE IN KOREA

Presenting you a solution to make your vehicles engine more efficient and contribute towards environment

MADE IN KOREA

For all typer of engines (4 strokes engines, 2 strokes engines,fuel and gasoline,turbo race engines.

The Graphene particles adhere to the metal parts in your engine forming a protection film that reduces friction and wear in your engine gear. Application also for gearbox differenciate chains, suspensions.

Reduction of fuel consumption,tempreture, oil consumption,noise and exhaust emission. Increase efficiency of the engine, and improve power output and engine life.

G-LAY UNICO

GRAPHENE ENGINE OIL ADDITIVES

Universal Restorer

Enhance the properties of conventional & synthetic oil

- Increase pick-up
- Reduce pollution
- Increase mileage
- Increase hours of usage
- Compatible with smaller engines &
- Metallic mechanisms

MADE IN KOREA

A Unique & Revolutionary Technology,

to enhance engine efficiency and also reduce pollution

To keep the Vehicle at its best...

...Engine health is the key

"THE CHOICE TO AVOID RISK IS THE CHOICE TO AVOID LIVING, AND TO AVOID LIVING IS ONE OF THE GREATEST RISK OF ALL."

G-LAY UNICO

ENGINE HEALTH IS IMPORTANT

Most Crucial part of Vehicle is Engine

• Good Engine health can result in many benefits
– For one, it will live longer, and will be less likely to suffer from frequent breakdown and increase environment pollution.

– Enjoy lasting performance, with minimal dips in speed, responsiveness and fuel efficiency.
– Regular engine maintenance will help the vehicle's value intact.

"Better Engine, Healthier World"

G-LAY UNICO

Over 20 years, India's annual PM 2.5 levels have increased by 42%, taking 1.8 years off the life of the average resident.*

Deforestation in India is the widespread destruction of major forests in India. It is mainly caused by environmental degradation caused by vehicle pollution.

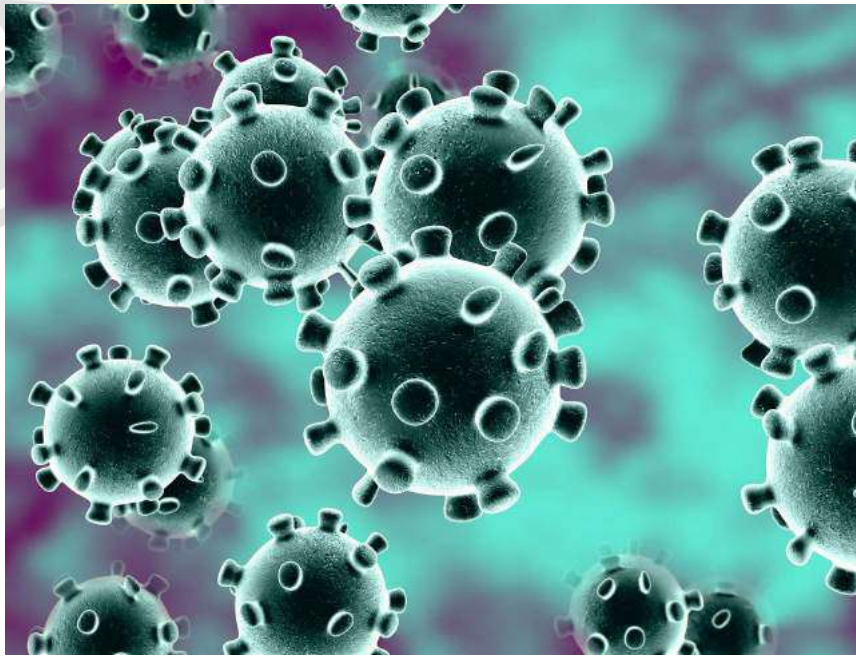

G-LAY UNICO

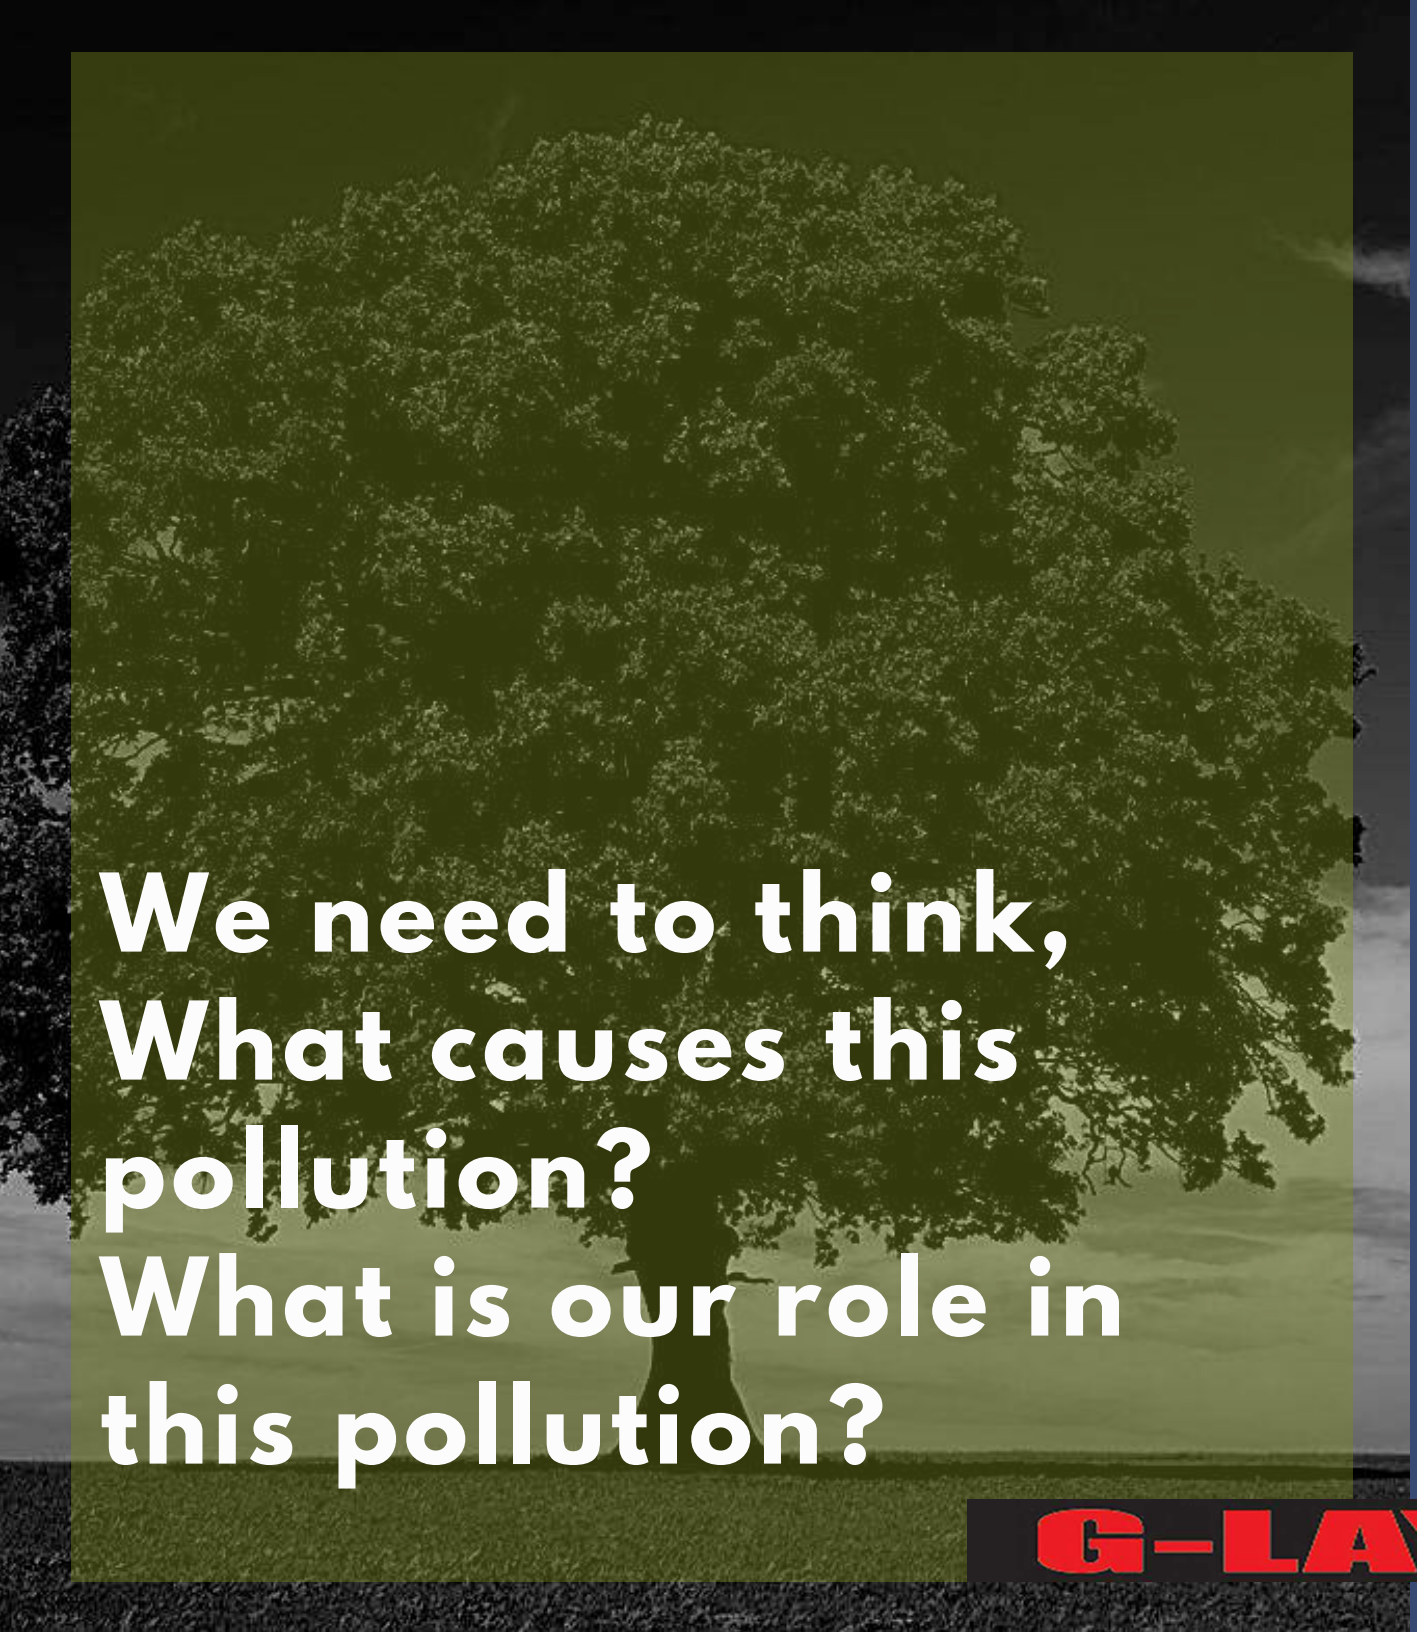

- Lung diseases are the second biggest killer in India.
- The WeekTwo thirds of air pollution deaths in India linked to diesel exhaust

Corona has killed maximum people having history of respretory disease.

ENGINE GRAPHENE LAYER

What is G LAY Graphene?

•G LAY Graphene is an additive for engine along with Engine oil for better engine health

• Nano Graphene is wonder material of dream for next generation, incomparable, effectiveness against all existing additives in the market.

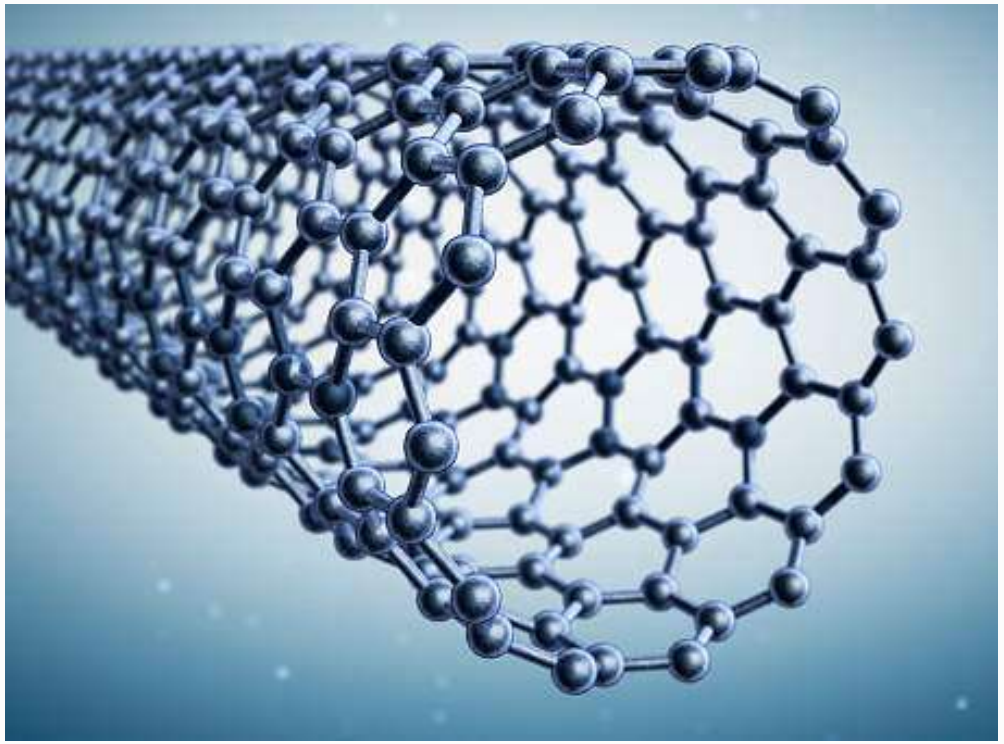

G-LAY UNICO

What is G LAY Graphene?

• A Unique & Revolutionary Technology
G LAY Graphene is a perfect Nano Cermet -

• It contains 20 Nano Meter Platinum Coated Zirconium Powder emulsified in mineral oil which is ideal for engine restoration & protection.

G-LAY UNICO

- **Platinum is 20 times harder and 6 times smoother than steel, these Nano particles create a hard & smooth coating layer on all the friction surfaces & moving parts inside the engine**

- **Zirconium coating acts like a thermal barrier coating inside the engine cylinder and prevents heat loss.**

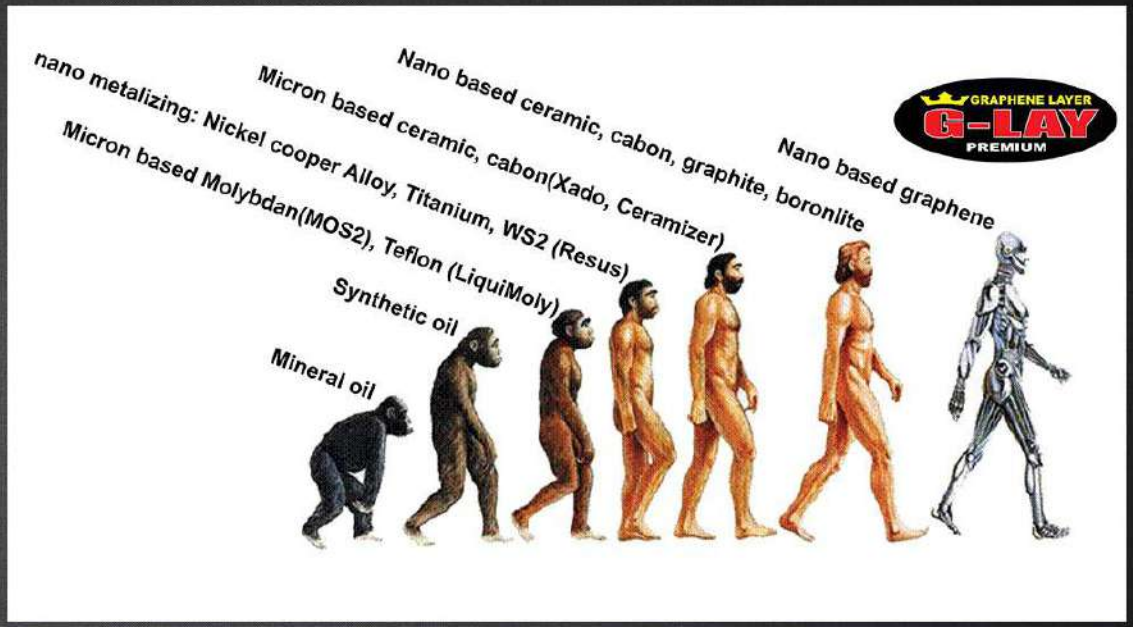

G-LAY UNICO

G-LAY UNICO

Graphene base engine oil additive is the latest offering worldwide for much superior performance than

*MOLYBDAN (MOS2)base

*CERAMIC base.

Approved by world leading brands

HONDA
The Power of Dreams
TOYOTA
Audi
Mercedes-Benz
Volkswagen
HYUNDAI
KIA

G LAY Graphene: Improves Engine Efficiency

Brings engine power up to maximum

• The G LAY Graphene uses Revolutionary & Patented Nano Graphene Technology It allows for easy Treatment of Engines and ,Restores Repairs & Protects.

• Graphene coating, especially with Zirconium, has a beneficial effects on engine efficiency and performance

G-LAY UNICO

G LAY Graphene: Improves Fuel Saving

Fuel saving upto 15%

- **Better mileage**
- **Better savings to the consumer**

G-LAY UNICO

G LAY Graphene: Reduces emission & Noise

- **Platinum coating helps to reduce emission upto 70%**
- **It also reduces noise and vibration**

G-LAY UNICO

Eco-friendly G LAY Graphene:Reduces CO2

1 passenger vehicle emits 4600 kg of Carbon Dioxide (CO2)
in a year

- **By using G LAY, you are reducing 60% to 70% CO2 emission per vehicle**

G-LAY UNICO

G LAY Graphene: application frequency

Single time coating last up to 30,000 km and make engine look like new and apply again

- **Reduce your maintenace cost of engine and frequent oil filter change.**

G-LAY UNICO

Change in Engine after G LAY Graphene

G LAY Graphene Makes Vehicle Engine Almost New

G-LAY UNICO

How to apply G LAY Graphene?

• It can be applied after the engine oil is changed, there is no need for re-dosing, recommended to change upon driving 30,000 km or 3X normal engine oil life. You can do small top up of oil if level go down.

Injection Method:

• Shake GLAY enough (50 times) before injection.
Open oil filler cap and inject GLAY slowly.

• Close oil filler cap and keep idle for 20 minutes or drive 30km.

G-LAY UNICO

“Better Engine, Healthier World” with G LAY Graphene

AN ADDITIVE, IT GIVES A PLATINUM COATING TO THE ENGINE

1. Eco friendly (Reduces CO2 emission)
2. Enhances engine life (makes it almost like new)
3. Increases horse power (efficiency ^15%)
4. Better mileage (fuel saving ~15%)
5. Reduced Air & Noise pollution
